

ASX Release - 28 May 2007

Clinical Computers signs up to THELMA

Clinical Computers Pty Ltd has signed up to use THELMA to deliver medical claims to Medicare and the private health insurance funds.

Clinical Computers is the seventh medical specialist software vendor to sign up to THELMA for medical claims in the last five months. THELMA now has about 60% national coverage of medical specialists.

Clinical Computers has been trading in Australia since 1978, providing services to specialist medical practices with emphasis on customisation to individual requirements.

Clinical Computers also provides a high quality patient administration system to day surgeries, some of whom have already been using THELMA to submit hospital accommodation claims to the health insurance funds.

Dr Stephen Segal, the Managing Director of Clinical Computers, said "We originally connected directly to Medicare, but the time and cost of maintaining the connectivity has been significant, certainly much more than we expected. THELMA provides an alternative which should reduce the time, cost and disruption of dealing with the constant new releases of Medicare's ECLIPSE and Online programs."

Clinical Computers are in the process of connecting to THELMA's claims services, which is scheduled to be completed next month.

About ICSGlobal and THELMA

Founded in 1990 as an engineering and IT consultancy, ICS Group listed on the Australian Stock Exchange as ICSGlobal Limited in 1999 [ASX:ICS]. Since 2000, ICSGlobal's core business has been the unique "any-to-any" health industry clearing house technology **THELMA** (Transactional Health Exchange Linking Multiple Applications), which ICSGlobal built, owns and operates. THELMA creates interoperability between the broad range of new and legacy software systems that typically exist in health systems. This enables health industry business partners in any country to conduct financial, clinical and administrative transactions electronically over the Internet.
