

ASX RELEASE – 5 DECEMBER 2006

Healthinc Connects to THELMA

Healthinc Pty Ltd, a leading supplier of software solutions to the Australian radiology market, have completed the integration of their latest product, the OCCAM RIS platform, to THELMA to enable real time bulk bill medical claiming to Medicare and inpatient medical claiming to health insurance funds.

Healthinc has been supplying Radiology Solutions to the Australian market for 5 years. They have a market share of in excess of 100 clients nationally and have seen revenue growth of 300% over the past four years.

Development of the Healthinc / THELMA solution has been completed and the rollout of the joint service to Healthinc's clients has commenced. The joint service will help Healthinc's customers by reducing paperwork, improving payment times and cashflow, and by reducing staff time spent invoicing and collecting medical fees.

The Managing Director of Healthinc, Michael Beck, said that THELMA was by far the best connectivity option to help Healthinc achieve their strategic objectives.

"At Healthinc our goal is to allow radiology clinics to move to a totally digital environment in a fast and economical way. This single connection to THELMA solves our connectivity needs, improves our customer service and enables us to focus on our core business of supplying quality radiology solutions" said Mr Beck.

About ICSGlobal and THELMA

Founded in 1990 as an engineering and IT consultancy, ICS Group listed on the Australian Stock Exchange as ICSGlobal Limited in 1999 [ASX:ICS]. Since 2000, ICSGlobal's core business has been the unique "any-to-any" health industry clearing house technology **THELMA** (Transactional Health Exchange Linking Multiple Applications), which ICSGlobal built, owns and operates. THELMA creates interoperability between the broad range of new and legacy software systems that typically exist in health systems. This enables health industry business partners in any country to conduct financial, clinical and administrative transactions electronically over the Internet. In Australia, THELMA's customer base continues to grow steadily, now standing at over 60% of private health insurers and over 40% of national private hospital beds. THELMA also processes claims into the national Medicare system. THELMA-UK is being rolled out across the UK private health sector. Plans for the rollout of THELMA in the US are being developed with a number of organisations, after THELMA was certified to operate in the US in November 2005.
